PROFILE

Electrical Engineering graduate from Universitas Udayana focused on Cloud and DevOps engineering. AWS Certified Cloud Practitioner with hands-on experience deploying applications on AWS (EKS, ECS) and managing on-premise servers. Applies Infrastructure as Code, automation, and security best practices in every solution built.

WORKING EXPERIENCE

Freelance Backend & AI Automation Developer Aug 2025 – Jan 2026

Edomatch B.V. | Netherlands (Remote)

- Built an AI-agent-powered cold lead engagement system integrating Apollo.io and n8n workflows with a FastAPI backend (RBAC), automating first-touch outreach to prospects sourced from a lead generation platform.
- Deployed the system on Railway and achieved a 23% lead qualification rate over 2 months.

Web Quality Assurance Intern Feb 2025 – May 2025

Timedoor | Denpasar, Bali

- Performed system monitoring and manual performance testing on client websites and applications built with Laravel, WordPress, and Shopify; wrote test case documentation and delivered improvement recommendations to B2B clients.
- Gained hands-on exposure to the software development life cycle (SDLC) and Agile methodology on client projects.

PROJECTS

Suika Dev Community – Infrastructure Management | Dokploy, Docker, Bun, Promtail & Grafana Loki 2025 – Present

- Set up and maintain the community's on-premise deployment platform using Dokploy and Docker, with centralized log management through Promtail and Grafana Loki.
- Contributed to a WhatsApp automation solution and an AI-powered job matching system built for a hackathon.

IoT-Based Automated Traffic Light Phase Controller | Django, Raspberry Pi, Machine Learning, AWS (ECS) 2024 – 2025

- Built a YOLOv5s computer vision model to detect and track traffic from a Raspberry Pi camera node, plus a Django backend that stores traffic data and decides traffic light phase allocation (capstone final project).
- Deployed the backend on AWS ECS; extended from the prototype that won 2nd place at ELCCO 2024.

VProfile GitOps Deployment | Kubernetes (EKS), Terraform, Helm, ArgoCD 2026

- Deployed a Java web application to an EKS cluster provisioned with Terraform, using a pull-based GitOps model with ArgoCD; built a CI/CD pipeline that tags and pushes Docker images to AWS ECR and updates the Helm charts.
- Added drift detection with approval-gated changes when live configuration deviates from the last applied state.

EDUCATION

Universitas Udayana | Jimbaran, Bali Sep 2021 – Aug 2025

Bachelor of Engineering (S.T.), Electrical Engineering (Control Systems & Robotics) | Faculty of Engineering GPA: 3.77 / 4.00

Relevant Coursework: Computer Networking, Internet of Things, Big Data, Embedded Systems, Computer Programming

- 2nd Place | National Prototyping Competition, ELCCO (2024): IoT & cloud-based traffic jam alerting system.
- Silver Award | International Innovative Idea Competition, ICIIC (2025): sustainable coffee dryer technology.
- 3rd Place | AI Hackathon, IMPHNEN (2025): AI-powered job matching system built with FastAPI and OCR.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EKS, ECS, Elastic Beanstalk), Terraform, Proxmox, Dokploy, Linux
Containers & Orchestration: Docker, Docker Compose, Kubernetes, Helm, ArgoCD
CI/CD & Automation: GitHub Actions, Jenkins, Ansible
Monitoring & Observability: Prometheus, Grafana, Grafana Loki, Promtail
Programming & Databases: Python (FastAPI, Django, computer vision), TypeScript (Bun, Node.js), MySQL, MongoDB
Internet of Things: ESP32, Raspberry Pi, Node-RED, FreeRTOS, PlatformIO

CERTIFICATION

AWS Certified Cloud Practitioner (CLF-C02) | Amazon Web Services 2026 – 2029
Cisco CCNAv7: Switching, Routing, and Wireless Essentials | Cisco Networking Academy 2024 – 2027
EF SET English Certificate (C1 Advanced) | EF SET 2025

LEADERSHIP & ACTIVITIES

Himpunan Mahasiswa Elektro (Electrical Engineering Student Association) | Universitas Udayana 2022 – 2024

Role: Head of Research & Development, Chief Student Lab Instructor, Member of Scientific Division

- Led the R&D division: managed student paper publications and coordinated student assistants for laboratory activities.
- Active in the IEEE Student Branch; student member of the IABEE curriculum assessment team (2023 curriculum onward).

Independent Campus Program (MBKM) | Universitas Udayana 2023 – 2024

Role: Member of MBKM Bina Desa (Community Development), Member of MBKM P2MW (Student Entrepreneurship Program)

- Bina Desa: built a coffee drying device in Pajahan, Tabanan, to counter climate-driven disruption of the drying process.
- P2MW: built a computer-vision plant disease detector and several IoT-based agricultural monitoring tools.
